

PRICING DEFINITION: A fee is generated for the deletion or repair of an item. A deletion is defined as a negative item being removed from any bureau for any reason during our service. A repair or correction is defined as an item in negative status being changed to positive status. An item is not considered repaired unless ALL negative information is removed from the reporting of the item. **IMPORTANT:** - All prices are per item and per bureau. A removal of ANY item from ANY bureau counts as ONE (1) removal. The deletion of an account from all three credit bureaus counts as THREE (3) deletions.

As per the FCRA: Only items that are 100% accurate, verifiable, and timely are allowed to be on your credit report. We challenge the credit bureaus to prove that these items are 100% accurate, verifiable, and timely. Qualified items are determined based on client input. According to CROA, credit repair organizations are forbidden from telling a client to dispute an item that is 100% accurate, verifiable, and timely.
